			MAIL DATE 12/13/2007	DELIVERY MODE PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

## Office Action Summary

Application No. **10/553,379**Applicant(s) **ESER ET AL.**

Examiner

Carl S. Miller

Art Unit

3747

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 01 October 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 5-10 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 5-10 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

As a necessary initial comment the examiner notes that the applicant's amendment of 10/01/07 is technically improper and probably should have been indicated as non-responsive to the last office action. This is because the amendment has improperly indicated that claims remain pending that had already been cancelled in applicant's amendment of 4/11/07. At that time the pending claims were 7-11 and Claims 5 and 6 had been cancelled. Applicant apparently completely skipped the Claims pending at the time of the last office action and went back to the office action before that in preparing his latest response. Despite this fact the examiner has chosen to respond to the applicant's amendment since the applicant has addressed, to some degree, the subject matter of the last office action. It is understood, however, that the applicant will be required to renumber the claims pending in an appropriate manner before any claims can be sent to appeal.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5, 6 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Bosch (DE('900)).

In particular, as noted in the last office action, the Abstract of the disclosure read in light of the foreign examiner's comments make it clear that the system of Bosch is, at least, responsive to "stored relationships between valve flow" and the applicant has agreed to this fact on page 4 of his last response. This fact is at least "a dynamics of a

flow of fuel through the regulator valve" as required by the claims. Even if the use of this variable is to speed up the calculation, the limitations of the claims are still met.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bosch (DE('900)) in view of Frank ('149).

Bosch applies as noted above and Frank teaches a fuel rail spill valve wherein the ball valve is pushed open by the pressure in fuel rail . Since this pressure pushes against the spring pressure one of ordinary skill in the art would have known that as the pressure in the rail rises less current would need to be sent to the solenoid in order to open the valve.

It would have been obvious to modify Bosch by using the solenoid of Frank to bleed the fuel rail and to operate it using less current as the pressure rises because the two systems were similar high pressure fuel systems.

Applicant's arguments filed 10/01/07 have been fully considered but they are not persuasive. In particular, the applicant's arguments have been addressed in the rejection under 35 USC 102 noted above. .
